

Certified Clinical Engineers Directory — 2026

Healthcare Technology Certification Commission

About This Directory

The Healthcare Technology Certification Commission (HTCC) administers the Certification in Clinical Engineering (CCE) program on behalf of the American College of Clinical Engineering. A Clinical Engineer is a professional who supports and advances patient care by applying engineering and managerial skills to healthcare technology.

Certified Clinical Engineers have met eligibility requirements of education and professional experience, provided professional references, and have passed both a written and oral examination. Certifications are issued under two boards: the US Board of Examiners (CCE-US) and the Canadian Board of Examiners (CCE-CA). Emeritus (CCE-E) and Retired (CCE-R) designations are conferred upon qualifying long-standing certificants.

All CCE certifications renew on a three-year cycle ending June 30 of the listed renewal year.

For questions, contact the HTCC Secretariat at certification@accenet.org.
