

Clinical Engineering and IT Excellence Recognized

Dear ACCE members and colleagues:

The 2015 ACCE/HIMSS Excellence in Clinical Engineering and Information Technology Synergies Award Recipient is Announced!

Jennifer L. Jackson has been named the recipient of the 2015 ACCE-HIMSS Excellence in Clinical Engineering and Information Technology Synergies Award, a joint award sponsored by The American College of Clinical Engineering (ACCE) and HIMSS. The Boards of directors of both organizations selected the recipient.

"Jennifer epitomizes the spirit of the 'Synergies' award. She's worked on device interoperability for about as long as I've known her. Jennifer's enthusiasm and dedication to Healthcare Technology Management and Health Care IT partnership affects those around her. She introduced me to the IHE efforts at an early showcase, which brought my analog self into the 21st century and helped me get involved. By continuing those efforts at the point of healthcare delivery, Jennifer enables the growth CE-IT synergies" said Paul Sherman, president of ACCE.

If you are planning to attend HIMSS16, join President Paul Sherman at the [HIMSS Award Gala](#), on Thursday, March 3 to congratulate Jennifer Jackson!
Tickets for the Awards Gala are available the [HIMSS16 Registration page](#), Optional Events.

Sincerely,

Suly Chi
